Professional Summary

Full Stack Developer with 3+ years of experience delivering scalable, production-grade web applications using the MERN stack and TypeScript. Led end-to-end development of 6 live SaaS products — from system design to deployment — serving multi-tenant architectures, real-time systems (Socket.IO), and third-party integrations (Razorpay, OpenAI, Google Calendar, Zoom). Recognized for on-time delivery, cross-team collaboration, and mentoring junior developers to maintain high code quality across fast-paced release cycles.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	React.js, Redux Toolkit, Zustand, Vue.js
Backend	Node.js, Express.js
Databases	MongoDB, MySQL
Cloud & DevOps	AWS, Nginx, Linux
Real-time & APIs	WebSockets (Socket.IO), REST APIs, Webhooks
Integrations	Razorpay, OpenAI API, Google Calendar, Google Meet, Zoom
Architecture	Multi-Tenant SaaS, RBAC, Authentication & Authorization, System Design
Tools	Git, VS Code

Professional Experience

Full Stack Developer | *Agami Technology Pvt. Ltd.* July 2023 – Present

Chatbotnexa *AI Chatbot SaaS | MongoDB · React.js · Node.js · Socket.IO · Razorpay*

- Built a multi-tenant SaaS platform enabling users to create, customize, and embed AI chatbots on any website via a single script tag — reducing client onboarding setup time to under 10 minutes.
- Integrated OpenAI API for intelligent, self-training chatbot responses; bots are trained on user-supplied data, eliminating the need for manual scripting.
- Implemented a real-time interactive avatar alongside the chat widget using Socket.IO, boosting visitor engagement on client websites.
- Integrated Razorpay payment gateway for subscription billing and plan management, enabling fully automated revenue collection across plan tiers.

ReadySurvey *Multi-Tenant SaaS Assessment Platform | MongoDB · React.js · Node.js · Express.js*

- Architected a multi-tenant SaaS platform from scratch with strict tenant-level data isolation, subdomain routing, and custom domain support — enabling scalable partner onboarding for 10+ enterprise clients.
- Designed a dynamic assessment builder supporting configurable question types, scoring logic, and conditional flows, empowering non-technical users to manage complex assessments without developer involvement.
- Led a cross-functional team of 4 developers: defined task allocation, conducted code reviews, and mentored junior engineers — delivering all project milestones on schedule with zero critical post-launch defects.
- Engineered secure MongoDB schemas with domain-aware access control and RBAC, ensuring strict data segregation across tenants.

Kalnexa *Scheduling Application | MongoDB · React.js · Node.js · Express.js*

- Led end-to-end development of a scheduling platform with timezone-aware booking and real-time availability management — recognized by management for on-time launch and production stability.
- Integrated Google Calendar, Google Meet, and Zoom APIs for automated meeting link generation and webhook-based event synchronization, reducing manual coordination effort for end users by an estimated 80%.
- Designed scalable REST APIs and database schemas supporting bookings, availability tracking, and user management across concurrent users.

Moserbus *Mortgage CRM Platform | MongoDB · Vue.js · Node.js · Express.js*

- Developed a performance-optimized CRM for mortgage professionals with modules for lead management, pipeline tracking, and communication workflows, reducing lead response time for agents.
- Built a highly configurable dashboard with dynamic tabs, customizable charts, and pre-processed data rendering — cutting average page load latency by ~40% compared to the prior architecture.
- Designed MongoDB schemas optimized for complex CRM queries in a database-per-tenant multi-tenant model, ensuring tenant isolation and query efficiency at scale.

Nediaz *Job & Business Opportunity Platform | MongoDB · Vue.js · Node.js · Express.js*

- Developed a unified platform connecting job seekers, employers, and business owners with multi-user architecture and Google Authentication, supporting 3 distinct user roles from a single codebase.
- Led frontend migration from Alpine.js to Vue.js, improving code maintainability and scalability — reducing component complexity and enabling faster feature delivery for the team.

Fusion24X7 *All-in-One Business Management Platform | MongoDB · React.js · Node.js · Express.js*

- Designed and developed a secure multi-tenant file/folder management module with real-time synchronization using WebSockets/Socket.IO, supporting concurrent access by distributed teams.
- Implemented RBAC and structured permission workflows for managing users, roles, and organizational operations, reducing access-related support issues through self-serve permission management.

Key Achievements

- Delivered Kalnexa scheduling application end-to-end — recognized by management for on-time release and a stable, defect-free production launch.
- Successfully delivered ReadySurvey SaaS platform, meeting all project milestones and client requirements.

Education

B.Tech in Electrical and Electronics Engineering 2018 – 2022

College of Engineering Roorkee (COER), Roorkee, Uttarakhand

Soft Skills

- | | |
|--|---|
| • Leadership & Ownership | • Problem Solving & Analytical Thinking |
| • Communication & Cross-Team Collaboration | • Adaptability & Fast Learning |
| • Time Management & Prioritization | • Mentoring & Code Review |

Certifications & Training

- ReactJS Certification — CETPA InfoTech Pvt. Ltd. (6 Weeks) | React.js, React-Bootstrap, Material UI
- Full Stack Web Development Bootcamp — Udemy (3 Months) | MERN Stack, Full-Stack Architecture
